Hello,

The US EPA has prepared the following information resource:

EPA is committed to working closely with response agencies and state and local officials to ensure the safety of citizens, respond to concerns and to evaluate impact to water contaminated by the Gold King Mine Release. EPA is sharing information as quickly as possible with the public as experts work to evaluate any effects the spill may have on drinking water, public health, agriculture, fish and wildlife. Please see our website for the latest information: <http://www2.epa.gov/goldkingmine>  
Regular updates will be posted as they are available.  
EPA Hotline: 844-607-9700 (toll-free)

Comments:

I have property utilizing irrigation water from the Animas river.  
My ability to irrigate my pastures has been halted due to my irrigation water being shut off . I have animals grazing this land and depending on this water to sustain my farms pasture.  
As of this evening I have lost a good portion of my necessary pasture and would like to know when I can begin putting water on my pasture to try to restore my feed. I know the Mayore Domo on this portion of the canal is doing all he can but seems to me people are training the people who don't care. especially the people in charge of this canal. Some water runs down some up lets get it going
